

Plantar Fasciitis Identification Using Shear Wave Elastography

If you want to participate in this study, contact us using this link:
<https://forms.gle/WnRiDCazBMaLHqT56>

Do you suffer from Plantar Fasciitis?

Ever wonder what causes the pain?

Researchers at Brigham Young University are interested in understanding changes that occur in the plantar fascia after plantar fasciitis develops.

Participation in this research study will include having measurements taken of your feet using ultrasound and performing simple foot and calf stretches. This study is designed to further the understanding of plantar fasciitis and increase effectiveness of rehabilitation.

Participants should be:

- symptomatic with clinically diagnosed plantar fasciitis

OR

- healthy, with no history of plantar fasciitis
- 18 years or older
- free from any other lower extremity injury for the past 3 months

Your involvement will include:

- A single visit at the BYU Ultrasonography Lab (292 SFH)
- Visit will be 2 hours in duration

You will receive \$30 cash for completion of this study.
